

Waste Electrical and Electronic Equipment Regulations

This section contains information about the Waste Electrical and Electronic Equipment Regulations (WEEE) that apply to all electrical and electronic equipment within the European Union.

When you dispose of any electrical or electronic equipment, including SMART products, we strongly encourage you to contact your local WEEE recycling agency for recycling and disposal advice.

Your SMART product required the extraction and use of natural resources for its production. It may contain hazardous substances. By disposing of electrical and electronic equipment appropriately, you lower the impact of these substances upon health and the environment and reduce the pressure on natural resources. Recycling agencies can reuse or recycle most of the materials from your product.

Please think about how you intend to dispose of any product that has a WEEE symbol or accompanying WEEE guidelines.

If you need more information on the collection, reuse and recycling of electrical and electronic equipment, please contact your local WEEE recycling agency. Alternatively, contact your local reseller or SMART Technologies for information on the environmental performance of our products.

FCC Notice

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING

Failure to follow the installation instructions shipped with your SMART Board product could result in personal injury and damage to the product.

Refer to the safety warnings and precautions published by the projector manufacturer. Do not stare (or allow children to stare) directly into the projector's beam of light.

Do not climb (or allow children to climb) on your SMART Board product. Climbing on the product could result in personal injury and product damage.

Do not stand (or allow children to stand) on a chair to touch the surface of your SMART Board product. Rather, wall-mount the product at the appropriate height or use a SMART height-adjustable floor stand.

To reduce the risk of fire or electric shock, do not expose your SMART Board product to rain or moisture.

Two people are required to mount your SMART Board product because it may be too heavy for one person to safely maneuver.

Ensure that any cables extending across the floor to your SMART Board product are properly bundled and marked to avoid a trip hazard.

CAUTION

Do not mount the SMART Board 660 or 680 interactive whiteboard on an FS570 floor stand. Using this older stand could result in personal injury and product damage. Use the FS670 floor stand for these products instead.

Move a floor stand-mounted SMART Board interactive whiteboard with care. Quick stops, excessive force and uneven surfaces may cause the product to overturn. Before moving a floor stand, make sure the anti-tip feet are retracted or locked in the up position.

IMPORTANT

You must connect the USB cable that came with your SMART Board interactive whiteboard to a computer that has a USB compliant port and that bears the USB logo. In addition, the USB source computer must be compliant with CSA/UL/EN 60950 and bear the CE mark and CSA and/or UL Mark(s) for CSA/UL 60950. This is for operating safety and to avoid damage to the SMART Board interactive whiteboard.

If your SMART Board product requires replacement parts, make sure the service technician uses replacement parts specified by SMART Technologies Inc. or parts with the same characteristics as the original.

NOTE: Other cautions and warnings are contained in the *SMART Board 600 Series Interactive Whiteboard Installation and User's Guide*, document number 1414 at www.smarttech.com/support.
